

Petition to Governor Jon Corzine and the New Jersey State Legislature

Dear Governor Corzine and State Legislators:

As your constituents, we are respectfully asking your help to deal with a significant impairment of our “Quality of Life” in the Garden State – excessive speeding on our roads. We urge you to introduce and enact legislation that would permit local law enforcement agencies to use photo-radar equipment to identify speeders and issue summonses that can be enforced.

New Jersey rightly takes pride in its high technology industry; let’s use that technology to improve our quality of life and actively promote public safety. This technology has been in use in Europe for over thirty years and is currently used throughout the United States. We thank you for your anticipated support in this important effort.
